## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 119-148 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 119 through 148 are replete with indefinite alternative language and variations of structure to an extent which renders the meets and bounds of the claims unclear and indefinite.

The use of the term "or equivalent" and "their equivalents" in the claims render them unclear and indefinite since the possible structure or structures that would be equivalent to the structure recited cannot be determined.

In one or more of the claims, the word "means" is preceded by the word "wheel" in an attempt to use a "means" clause to recite a claim element as a means for performing a specified function. However, since no function is specified by the word(s) preceding "means," it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph. See *Ex parte Klumb*, 159 USPQ 694 (Bd. App. 1967).

In one or more of the claims, the word "means" is preceded by the word "some second" in an attempt to use a "means" clause to recite a claim element as a means for performing a specified function. However, since no function is specified by the word(s)

preceding "means," it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph. See *Ex parte Klumb*, 159 USPQ 694 (Bd. App. 1967).

In one or more of the claims, the word "means" is preceded by the word "some third" in an attempt to use a "means" clause to recite a claim element as a means for performing a specified function. However, since no function is specified by the word(s) preceding "means," it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph. See *Ex parte Klumb*, 159 USPQ 694 (Bd. App. 1967).

In one or more of the claims, applicant has attempted to further define the structure of the invention claimed by numerical reference to structure set forth in the specification and drawings. While applicant is not prohibited from providing reference numerals in the claims, they must be in parenthesis and they cannot be relied upon for further defining the structure of the claim.

An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

A listing of registered patent attorneys and agents is available on the USPTO Internet web site <http://www.uspto.gov> in the Site Index under "Attorney and Agent Roster." Applicants may also obtain a list of registered patent attorneys and agents located in their area by writing to the Mail Stop OED, Director of the U. S. Patent and Trademark Office, PO Box 1450, Alexandria, VA 22313-1450

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 119-148 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Fresco 5,609,278.

Due to the indefiniteness of the structure set forth in the claims, a clear representation of the claimed invention cannot be determined. Fresco, however teaches an articulated backpack comprising a frame which is convertible to a wheeled carrier and attachable to a bicycle/scooter which has lower left and right points and a upper portion which has a center. The upper center point of the frame is clearly capable of receiving a bag which is configured to have a central attachment means.

***Response to Arguments***

5. Applicant's arguments filed November 7, 2003 have been fully considered but they are not persuasive. Applicants arguments directed to what is purported to be claimed have been considered. Applicant has however failed to argue how the claims

as presented set forth structure which distinguishes them patentable over the cited prior art.
